<b>Finalize Plans</b> <ul style="list-style-type: none"> <li>♦ Develop final plans</li> <li>♦ Prepare for bids</li> </ul>	<p>December 2008 through February 2009</p>
<b>Construction</b> <ul style="list-style-type: none"> <li>♦ Project construction</li> </ul>	<p>Summer 2009</p>

## Project Summary

Through a jurisdictional transfer, the Utah Department of Transportation (UDOT) has acquired ownership of 10th West, also known as State Route 252, and plans to design and build needed improvements along the corridor.

**The project limits** include 10th West from the intersection at US-91 on the south, to 2500 North. The project also includes the segment of 2500 North from 10th West to US-91 (Main Street). See the project area map on reverse side of this newsletter.

UDOT has contracted with Civil Science, Inc. to design roadway improvements. The Civil Science team will complete the roadway design based on sound engineering principles and public input from State, County, City, local businesses, area residents and the general public through a structured public involvement program. **Key public involvement activities** include site visits and update meetings with property owners, public open houses, local government workshops and formation of a transportation advisory committee (TAC) to provide ongoing technical input and ensure local issues are addressed. See the project web site at [www.udot.utah.gov/tenthwest](http://www.udot.utah.gov/tenthwest) for more details on the public involvement program.

**Issues already identified** that will be addressed as part of the design process include safety for motorists and pedestrians, corridor speed, congestion, property access, storm water system operation, pavement condition, railroad crossing, Logan River bridge crossing and wetland conditions. Additional issues and input from the public through the public involvement program will also be incorporated into the design discussion.

**Potential improvements** to address outstanding issues and future needs could include additional lane capacity, pedestrian facility improvements, intersection improvements, curbs and gutters, stormwater system upgrades, Logan River bridge widening and other elements as needed to address the functional and public needs for the roadway. It is intended that improvements will be planned within the existing right of way as much as possible. If it is determined that improvements to meet future needs require additional right of way, more input will be gathered. UDOT and the project team encourage your participation in the process to help ensure the final design and improvements consider your concerns and input.

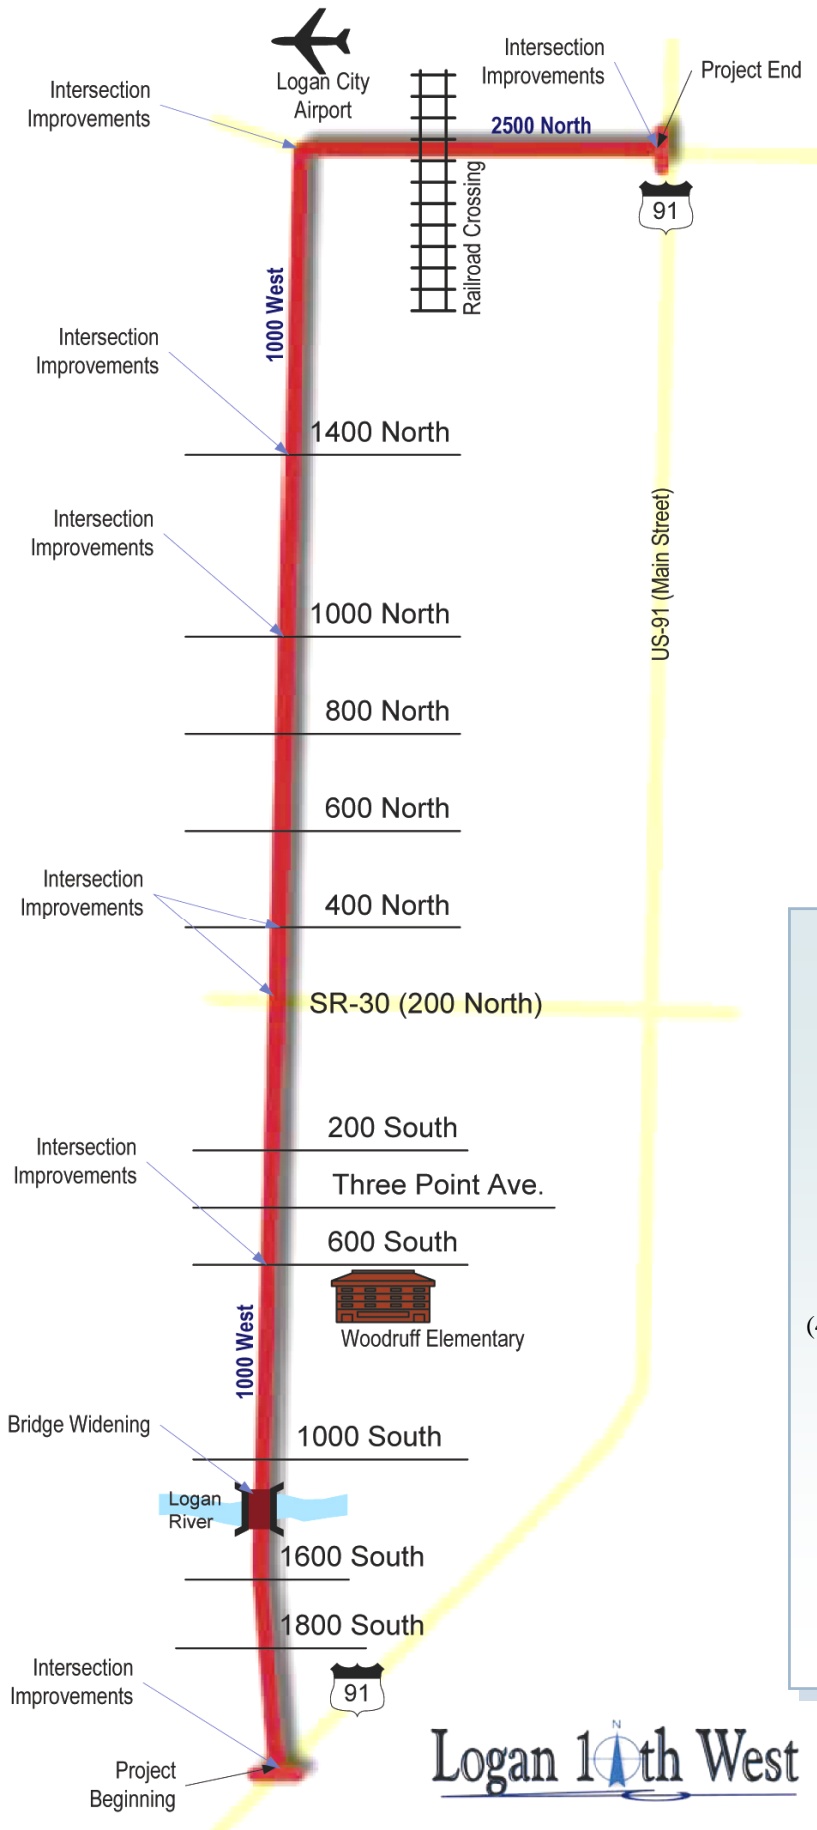

## Public Open House #1

*To introduce the project, present known roadway conditions, answer questions and gather input on other issues to be addressed*

**When:** Thursday, May 1, 2008  
6:00 p.m. to 8:00 p.m.

**Where:** Woodruff Elementary School Multi-purpose Rm.  
650 S 1000 W, Logan, UT 84321

## TO LEARN MORE

### Visit the Project Web Page

Please visit the project web page at [www.udot.utah.gov/tenthwest](http://www.udot.utah.gov/tenthwest) to view current project information including project maps, notice of upcoming public and property owner meetings, project schedule, design information and contact information.

### Attend a Property / Business Owner Informational Session

Property owners and business operators along the project are invited to attend information sessions during the planning process. Periodic sessions will be organized for each of two project sections: 1) from US 91 north to 200 North and 2) from 200 North, north to US 91. The sessions will provide an overview of the project status and opportunity to discuss relevant issues such as access, drainage, design and the anticipated construction schedule. See the front of the newsletter for general dates. Property / business owners will receive detailed invitations prior to each meeting, including dates, times and locations.
